

## Pariah

Dream On, Dreamer

Welcome back to the world  
Believe in what you are told  
We get confused  
So we feel abused  
Day in & day out I stare into an open sunset  
Waiting for the dark to arise  
Ohhh god I'm feeling so blessed  
Devour all good we have left  
I can't speak through my mouth when it's moving  
I can't sleep cause like I'm losing the fight  
You had something to love but you fucked it  
Hold it in, this time just swallow your pride  
Welcome back to the world  
Surrender is the only way out  
You're just a number Dead or alive  
Day in & day out  
I can't speak through my mouth when it's moving  
I can't sleep cause like I'm losing the fight  
You had something to love but you lost it  
Hold it in, this time just swallow your pride  
It's the reason you're bent and you're broken  
It's the reason you're not gonna give up the fight  
You had something to love but you lost it  
Hold it in, this time just swallow your pride  
You're all just like me  
Lose blood and break bone  
Move stone to get home  
Just to find what you believe  
You're all just like me cause you're all just like me  
We share the same hopes,  
Choke on the same ropes...  
I left my heart in the dark  
Where it can't be seen thousand open wounds  
they won't be hurting me  
I'm the black sheep  
That doesn't come when you call  
Just treat me with respect  
We're all made from flesh and bones  
I'm stuck like a thorn in your eyes  
I turn every living hour from day into night  
I want you stab my soul once again  
It's not gonna hurt  
We are here until the end it's not gonna hurt  
We are here until the end  
No it's not gonna hurt  
Cause I refuse to be anything like them  
anything like you  
I refuse to be anything like you
