Dreamland

Dreamtale

Come with me my friend You'll see a place beyond reality Fly into the night with me Together through eternity

Earth they call this place they live Look (at) the mountains, oceans so deep Hatred, fear, intolerance Peace will never have a chance

School too hard for man to learn Were those lessons from the past Time will show 'em answers true One day they will learn to

[Chorus]

Fly with me toward the morning light You will see what lies beyond the night Place so real, where is no fear No need to shed any tears
