

There's a way  
A way to get out of here  
To escape these storms and find some shelter  
To rid of your darkness, to rid of your boredom  
There's somewhere  
Somewhere that you can go  
It's obvious, well, well it's apparent  
It's right in front of you  
So reach out and take it  
And just let go

Our sobriety will diminish  
Discriminate we fade slow, fade slow  
These drugs will expand us  
United we will grow  
Let go, Let go

There's a way  
A way to squash all of your fears  
When everyone around you seems to be a stranger  
You feel their eyes upon you  
Your hearing their thoughts  
As they walk away their voice grows louder  
Illusions illuminate  
While your delusions dictate your next move  
You're bound by deception and a misled direction  
So just let go

Our sobriety will diminish  
Discriminate we fade slow, fade slow  
These drugs will expand us  
United we will grow  
Let go, Let go, Let go

There's a way  
A way out of here  
There's a way  
A way out of here  
So just let go

Our sobriety will diminish  
Discriminate we fade slow, fade slow  
These drugs will expand us  
United we will grow  
Let go, Let go
