

Dual Enemy

Drist

Your enemy looks down on you
To bring up the moment to justify you
I try and think about those words you choose
To never talk about

Your enemy looks down on you
To buy some more time the ones that get you
A second waterfront I watched you go
And never talk about

I'm on the inside counting down
And with the fear I hold the knife
And when they finally get to you
Just never give them a chance to move

And you finally lived through
To find your enemy is you

Just like a whore, so walked around
Check out that adore as you circle good night
Let's try and go without a finger through
You never wanted out

I'm on the inside counting down
And with the fear I hold the knife
And when they finally get to you
Just never give them a chance to move

And you finally lived through
To find your enemy is you

And you finally lived through
To find your enemy is you

Pull them safe
And you finally lived through
And mark your way
Your enemy is you
Leave them high
And you finally lived through
Walk away
Your enemy is you
