Makin Luv

Girl you go me thinking bout your love So many things I wanna say to you So much pressure sticking out of me Its coming out of me, and I need to be inside

(Need to be inside of you)
Wont you come and ride
Cant wait any longer, the feelings getting stronger
Its stronger I'm bout to explode

We should be making love We should be making love Until we've both had enough We should be making love

I'm going crazy Because I'm thinking bout that vicki secrets on The other day, when you came by my way I wanted you to stay

I wanted to stop you at the top Pull those panties down, Your hand on the wall And bend you over And baby when I put it in your never gonna want me to stop

We should be making love We should be making love Until we've both had enough We should be making love

Sweat dripping in an out Round and round Up and down Breathing out I said fast or slow

We should be making love We should be making love Until we've had enough We should be making love

Dru Hill
