

What Are We Gonna Do

Dru Hill

Whispers passed in silence
Two lovers passing in the night
A love that's left and hopeless
That can never survive

What are we gonna do
What are they gonna to say
Where are we gonna to go
When they find out

What are we gonna do
What are they gonna say
Where are we gonna go
When they find out

Sing your song, sing your song, sing your song
Really don't know you well
Got to get to know me too
So see, we can make this work
Through your friends won't approve

See, we can't let them know
Exactly what's going on
Cuz they won't understand
What we have between us

Woody, Woody, Woody, Woddy
I know we may be rushing
There's no time to think it through
Cuz when love overcomes your heart
There's nothing you can do

Misery loves company
By now you should know
People always have advice about being together
When they're all alone

I cry
I cry, I cry, late at night baby
Inside
Inside my heart babe
I was all alone
Don't you let no God damn body come near
And tear our love apart
Cuz I love you girl
You're all my world
So what are we gonna do

What are we gonna do
I feel so afraid, babe
Feel like a baby
Just hold me darling
And let me know
I need to know
I've got to know
What are we, oh baby

What are we gonna do
Oh well, well, well, well, well, well
Oh baby, well, well, well, well
