What Are We Gonna Do

Whispers passed in silence Two lovers passing in the night A love that's left and hopeless That can never survive

What are we gonna do What are they gonna to say Where are we gonna to go When they find out

What are we gonna do What are they gonna say Where are we gonna go When they find out

Sing your song, sing your song, sing your song Really don't know you well Got to get to know me too So see, we can make this work Through your friends won't approve

See, we can't let them know Exactly what's going on Cuz they won't understand What we have between us

Woody, Woody, Woody, Woddy I know we may be rushing There's no time to think it through Cuz when love overcomes your heart There's nothing you can do

Misery loves company By now you should know People always have advice about being together When they're all alone

I cry I cry, I cry, late at night baby Inside Inside my heart babe I was all alone Don't you let no God damn body come near And tear our love apart Cuz I love you girl You're all my world So what are we gonna do

What are we gonna do I feel so afraid, babe Feel like a baby Just hold me darling And let me know I need to know I've got to know What are we, oh baby

Dru Hill

What are we gonna do Oh well, well, well, well, well, well Oh baby, well, well, well, well
