I feel stained and I'm in pieces
In my mouth the sad taste of the past I had
A thousand wasted kisses
But another glass

And a cigarette
Just anything
To help forget the things that
Every day I still find missing

Let the whole world crash down on me And let the curtains rise I could do so much harm I could do you no good

I'll leave a stain in your heart
I would
Yeah, I'm gonna mess up your life
And make you forever blue

'Cause I could hurt you I know I could I know I could Misty haze and the final rest

They say the first shall be the last But not for me 'Cause I don't believe it So another glass

And a cigarette
Just any man
To help forget the things that
Every day I still find missing

Let the whole world crash down on me And let the curtain rise I could do so much harm I could do you no good

I'll leave a stain in your heart
I would
Yeah, I'm gonna mess up your life
And make you forever blue

'Cause I could hurt you I know I could I know I could

'Cause I could do so much harm

Yeah I could do you no good
I'll leave a stain in your heart
I would
Yeah, I'm gonna mess up your life

And make you forever blue 'Cause I could hurt you

I know I could I know I could
