Trouble always follows me
But trouble ain't a bad place to be
I'll get my shit by it, if I can
But I stand on my own, and I'm
my own man

The only age I know is the dark age
All the people I know put me in a cage
The only age I know is the dark age
The only light I know is in this dark space
I'm the portrait of your patronization
Have you ever looked at my face?

They try to make a mess out of me They're heading for a social catastrophe

They try to make a mess out of me Alienation, false masturbation, incrimination
My soul salvation, discrimination, isolation
No consolation here

Always follow me Always follow me
