

# Follow The Light

## Dungeon Family

You don't use our music to get high  
Then use our music to get by

Break!!

Ooh-ooh, ooh-oo-oo-ooh  
Ohh, ba-doo-do-doo-doo-doo  
Follow the lights, they  
Lead to something...  
Ooh-ooh, ooh-oo-oo-ooh  
Ohh, ba-doo-do-doo-doo-doo  
Follow the lights, they  
Lead to something...  
Ooh-ooh, ooh-oo-oo-ooh  
Ohh, ba-doo-do-doo-doo-doo  
Follow the lights, they  
Lead to something...

The time we're face-in, uhh  
Get off your feet cuz time is wast-in, uh  
Must be strong in this situatio-in, well  
So raise your hand and let's start takin, let's start takin  
Let's go, let's go, let's go, let's go

Even In Darkness  
Darker than the Lochness monster's dwelling  
It don't scare me, that's fairy telling  
But what about Hell and Heaven?  
Nothin is that ir-rel-ev-ent, you must find yourself, your intent  
Don't commit thyself, cuz another nigga done did it  
In and outta style like leather African pennants  
Say that your with the spirit, follow the Ten Commandments  
Mad Mixmaster said, "Now can ya spin it?" Say NOW!!

Gipp the epiphany  
I wanna be remembered in infamy  
Composer and producer of the symphony  
I done had struggles in my life, so I know that it was meant for me  
You was sent for me  
Showed me light through the power of chi and your intent to see  
You teach for He, discretely  
Givin them a piece of me -- the peace was free, gone

What I need, what I want, what I see  
Is two different things, two different...

It was so elequent-aly, I emerged from the sorta verse  
Origin purpose be partially profound of the very power that's in me  
When God said he so loved the world, that he gave his only begotten son  
I thought he meant me  
Jesus is my older brother evidently, experiment in me  
Let the complexity collapse the pocket quickly  
Life is but a dream, ya row ya boat gently  
It's cool to have a Bentley, I want a Bentley  
Yet I ponder why, I smoke my presence prominently?  
If you want your mind blow, look we're all alone... Follow the light

[Chorus to fade]
