

So Long Suicide

Duran Duran

Rock-a-bye baby it's time to break habits that you face sweet sorrow of the cherished dead
Blow in my mouth every breath I take although I need you I don't wanna bleed for you

So long suicide going right out of sight out of mind leave me a lone and abandoned
Hello I'm alive I'm lone and alive in my bones I know what I'm good for
Hello I'm alive I'm lone and alive yes I know in my bones I know what I'm doing

I stole the beauty and taste the hurt there's always time for pretty flowers growing in the dirt
But time is your needle into my heart and I must be hollow coz I can't follow that

So long suicide going right out of sight out of mind leave me a lone and abandoned
Hello I'm alive I'm lone and alive and I know in my bones I know what I'm good for
Hello I'm alive I'm lone and alive yes I know in my bones I know what I'm doing

I'm scared of being unendearing
But I just wanna live like anyone and you know it's hard to make it
But our life goes on
And after all the crash and swell we are just human
And after all is said and done we're only human
You're out of sight and out of mind I'm saying so long suicide
The half dream shape of yesterday in bloom tomorrow
