

## What Are the Chances?

Duran Duran

Any other day and you might have gone walking by  
Without a second look  
Any other way but I'm still mystified  
I'm just trying to change my luck  
Staring out the world and waiting for the one  
But the world won't look away  
The world does not explain

So, what are the chances?  
We'll never know  
If we take it for granted  
A diamond explodes  
What are the chances?

Playing with your life or is it destiny  
Which sets you on a path  
Is it out of tries that you're here next to me  
Or just the aftermath  
Of moments as they pass

So, what are the chances?  
We'll never know  
If we take it for granted  
A diamond explodes  
What are the chances?  
We are lost in the flow  
And looking for answers

So, what are the chances?  
We'll never know  
If we take it for granted  
A diamond explodes  
What are the chances?  
We are lost in the flow  
And looking for answers
