

Ignorance Of Pride

Dystopia

You killed again today
She was 12 years old
You killed her mother too
When she bent down to help her
And you killed again today
He overdosed on drug
He was a friend of mine
I know that you don't care
Except for money and power
And the force to make everyone cower
The system makes it's money off you
Kill each other off just like they want you to
Ways to survive don't involve killing your kind
Poverty is colorblind
The systems fault not yours or mine
Kill again for more respect
Kill some more to make you look tougher
Kill again but look whos losing
Poverty is government made
Kill again for more respect
Kill again to make you look tougher
Kill again but look whos losing
Stomping out your own fucking race
Racism starts with a twisted idea
Genocide starts with the squeeze of a trigger
Both are easy to do
Both are fucking stupid
