

# All I Desire

E-Rotic

Sometimes at night I know you're sad and lonely  
There's no-one there to call  
You're one and only  
And all your friends, they seem so far away... away from you  
What can you do?  
Want you to know I'll always be beside you  
And through the night my heart will always guide you  
Believe in me and you will find out that it's so true  
I'll be with you

You give me all I desire in the deep of the night  
You make my love spread like fire  
Hold me close, hold me tight  
You give me all I desire, all I need to survive  
You keep the flames growing higher  
Gotta hold over me, over me

Sometimes at night I know you feel like crying  
Your heart's so weak and all your dreams are dying  
You need a friend  
You need a helping hand to stand the pain  
You feel insane  
Want you to know I'll always be beside you  
And through the night my heart will always guide you  
Believe in me and you will find out that it's true  
I'll be with you

You give me all I desire in the deep of the night  
You make my love spread like fire  
Hold me close, hold me tight  
You give me all I desire, all I need to survive  
You keep the flames growing higher  
Gotta hold over me, over me

You give me all I desire in the deep of the night  
You make my love spread like fire  
Hold me close, hold me tight  
You give me all I desire, all I need to survive  
You keep the flames growing higher  
Gotta hold over me, over me

You give me all I need  
You give me all I long  
Oh baby, uuhh

You give me all I need  
You give me all I long  
You give me all I need
