I Want You

But don't you know I want you? Soul to soul Can't you see I'm falling? Can't you hear me I'm calling To reach your heart? Soul to soul When the night is burning And the shadows are turning To make us part Baby, don't cheat me And if you need me Treat me right But don't you know I want you? I will keep you from danger if you want me too I want you If you want me I'll make it, if you want me I'll take it All that you're gonna give Don't you know I want you? I will love you forever if you want me too I want you If you want me to reach you, if you want me I'll teach you How to love and to live Baby, 'cause I want you Soul to soul Say you stay forever I will make it together through night and day Soul to soul When the flames get higher Feel the heat of the fire Don't qo away Baby, don't cheat me And if you need me Tonight
