

# Gotta Do Something

East 17

Yeah, we gotta do something  
Yeah, we gotta do something fast  
Yeah, we gotta do something  
If we want this world to last

Starvation, mountains made of wheat  
World balance, this could not be  
Some have pennies, others have pounds  
Some have diamonds shining in their crowns

Fall apart, it's falling down  
Do something, do it now  
Do something, do something  
Do, do-a-do-a-do something now

Yeah, we gotta do something  
Yeah, we gotta do something fast  
Yeah, we gotta do something  
If we want this world to last

Destruction, bombs ready to drop  
Whole world at war, it's got to stop  
We gotta love to stay alive  
We've got to pray that we all survive

Fall apart, it's falling down  
Do something, do it now  
Do something, do something  
Do, do-a-do-a-do something now

Yeah, we gotta do something  
Yeah, we gotta do something fast  
Yeah, we gotta do something  
If we want this world to last

Sacrificed our future, crucified our past  
What are we gonna do, if we're gonna last?  
Times are getting harder, harder by the day  
Everybody help this world, everybody pray

Something for the rich, something for the poor  
Something for the ones that ain't too sure  
Something for the heart, something for the soul  
I think a real leader better take control  
Take these lads back to where they're at  
Fulfill the plan of man, get back on the track  
Cause we're being watched by the eyes above  
Yeah, the eyes of love

Something for the free, something for the sorrow  
Something for today so we see tomorrow  
So much to be done, to be cleared  
The rubble and trouble just seem to double each year  
Bigger and bigger, getting worse  
Building and building, about to burst  
So do something before we're gone  
And we're just a rock where a world went wrong
