

Satellite

Echo & the Bunnymen

Moonlight, starlight
Insight, out of sight
Something's certain
Draw the curtains, draw them

Take the night when it calls
Take the night when it falls
When it falls, when it falls, when it falls

You will, I might
Talking satelllites
Rockets, comets
Something's coming

Take the night when it calls
Take the night when it falls
When it falls
Take the night when it falls

What out, all out
In doubt, far out
Wheels in motion
Take it, take it, take it the potion

Take the night when it calls
Take the night when it falls
When it falls, when it falls, when it falls

Moonlight
Starlight
Insight
Out of sight

Take the night when it calls
Take the night when it falls
When it calls, when it falls
When it falls, when it calls
When it falls, when it falls
When it calls, when it falls

Oh when it falls
It falls, it falls
It falls, it falls
It falls
