

## Think I Need It Too

Echo & the Bunnymen

Must have forgotten something  
How to forget how to be true  
Covered myself in numb things  
Don't touch me, and I won't touch you

Trying to remember something  
Why am I here? And who are you?  
You must have meant something  
Animals came in two by two

Whatever you want  
Whatever you need  
Whatever you want  
Whatever you need  
Think I need it too  
I think I need it too  
I think I need it too

Just as I thought I'm thinking  
How can I change when I don't want to  
Kept getting caught kept drinking  
How can I blame what I've got to  
Putting the wheels in motion  
Auto-pilot, I can't drive  
Covered in calomine lotion  
Scratching my heatlumps bee-stung hives

Whatever you want  
Whatever you need  
Whatever you want  
Whatever you need  
Think I need it too  
I think I need it too  
I think I need it too

Whatever you want  
Whatever you need  
Whatever you want  
Whatever you need

Whatever you want  
Whatever you need  
Whatever you want  
Whatever you need  
Think I need it too  
I think I need it too  
I think I need it too  
I think I need it too  
I think I need it too
