

# Get Into My Car

Echosmith

Been driving all night  
It's stuck in my mind  
Burning through lights  
All I can find  
Is lonely in a guarded room  
But I don't wanna leave too soon  
In case I miss someone like you

They are my goodbyes  
I'm done for the night  
Saw you outside  
And I look in your eyes  
Falling in a deep unknown  
Getting late, I have to go  
I can't leave, I have to know

Get into my car, get into my life  
Get into my heart, you know what I like  
Can give me something that I don't know how to live without  
I don't wanna miss and I can't let this could pass me now

It's taking me up  
You're talking me down  
Your love is so loud  
And it's drowning them out  
Voices in my head again  
Where you start is where they end  
Never gonna wanna let you live, yeah

Get into my car, get into my life  
Get into my heart, you know what I like  
Can give me something that I don't know how to live without  
I don't wanna miss and I can't let this could pass me now

And I, and I, and I've got my head spinning, spinning  
And I, and I, and I feel like I've been running  
And I, and I, and I've got this feeling, feeling  
That you and I, that you and I will just keep driving

Get into my car, get into my life  
Get into my heart, you know what I like  
Can give me something that I don't know how to live without  
I don't wanna miss and I can't let this could pass me now

I just wanna drive  
I just wanna drive  
I just wanna drive  
I just wanna drive, drive, drive

So get into my car
