

The Ghost Within Me

Echoterra

Without you, without you
Thenights are long, cold dark
Without you, without you, I'm yearning
Foryour sinful touch

Far away we will find our own way
In decay we will fade into the light

I know you're always with me
Together just you and me
I know you're right beside me
The Ghost Within Me
I know you're always near me
Forever we will always be
I feel deep inside of me
The Ghost Within my Heart

Without you, without you, I feel so empty inside
Without you, without you, I walk into the endless
Night

Far away we will find our own way
In decay we will fade into the light

I know you're always with me
Together just you and me
I know you're right beside me
The Ghost Within Me
I know you're always near me
Forever we will always be
I feel deep inside of me
The Ghost Within my Heart

Far away from the lives we used to know
All I ever wanted was to be with you
