

Once More

Eddie Cochran

If I could see you once more, if I could touch you once more
If I could tell you I need you once more (once more)
To hold you near me once more and feel your kisses once more
If I could share your love like I once did before
No simple explanation can tell you how I feel
I miss the old sensation that was once so warm and real
Please let me open the door to all we knew once before
Say you'll forgive me and love me once more
