

# Fire And Water

Eddie Money

I just can't cool it down

I said something to you baby that I might be fed  
You said something to me baby that I just can't forget  
Though we've been through this before, love is a reviving goal  
Give and take a little more

Just like fire and water colder than hotter most of the time  
Always coming and going never really knowing where the trouble  
lied

Baby we know what we got, we know what it takes  
So how come we're so far apart?  
Just like fire and water breaking my heart...Now, now, whoa

You do things that drive me crazy and you know it's true  
Still I go crazy every time I make love to you  
No one ever wants the way, no matter what the others say  
Love will always find a way

Just like fire and water colder than hotter most of the time  
Always coming and going  
Never really knowing where the, where the trouble lied  
Baby we know what we've got, we know what it takes  
So how come we're so far apart?  
Just like fire and water, oh yeah, breaking my heart, my, my, m  
y heart  
We have enough time and time receding again (time and time agai  
n)  
Well it's been hard on you & harder on me, baby at least we're  
friends

Fire and water...Now now now now now now now...

Though we've been through this before, love is a reviving goal  
Give and take a little more

Just like fire and water colder than hotter most of the time  
Just coming and going never really knowing where the trouble li  
ed  
Maybe we know what we've got, we know what it takes  
So how come we're so far apart?  
Just like fire and water, just like breaking me, colder than ho  
tter, oo-oo  
Just like fire and water colder than hotter most of the time  
Always comin' and goin' never really knowin'  
Where the, where the trouble lied
