

How Did You Know

Eddy Arnold

How did you know I was lonely how did you know I was blue
How did you know needed someone someone just like you

Why did you call at the right time whatever said you to me
How could I ever get so lucky I never thought it could be

You walked right in took my hand made my poor heart smile
You walked right in took command and made my life worthwhile

How did you know I adore you how did you know I loved you so
You are the love I always wanted tell me how did you know
[guitar]
You walked right in took my hand...
