One Perfect Something

Edgewater

She says she's sick of all the things that fall She makes no sense tonight her minds alright But age sets in

She's pushing away her flight of life
It's out reflecting a thousand miles of light

Just one person

Just one wrong or right

Just one perfect

Just one way

She's pushing away her flight of life It's out reflecting a thousand miles of light Could we compromise just once?

She says she's sick of all the things that fall She breaks the silence to the world she hates

There's just one person for me Just one wrong or right Just one perfect something Just one way
