

# Every Night Without You

Edguy

Waiting up all night  
I am lying by your side  
I can't close my eyes and slowly dream away

I so need to feel you near  
The sight i'd see, the breath i'd hear  
Watching till the break of day

Long cold nights  
I had to stumble through in a lonely life  
Wind and rain till you walked inside

Every night without you i'd sail on  
Don't know how i'd make it through without you  
Every night without you, my angel  
Pity for the zillions around  
Who're every night without you

It's not always easy to find the words I need  
And tell you all the things I really feel

But watching you beside me  
The silence tells the truth  
We know that it's forever and for real

Long cold roads  
I had to stumble down in a long gone life  
Wind and rain and you walked inside

Every night without you I'd sail on  
Don't know how I'd make it through without you  
Every night without you, my angel  
Pity for the zillions around  
Who're every night without you  
Every night without you

I ran around guided by the neon signs  
I burned the candle at both ends  
Why would we die for the things we've never lived to see  
Striving for peace of mind

Solo

Every night with...  
Every night without you I'd sail on  
Don't know how I'd make it through without you  
Every night without you, my angel  
Pity for the zillions around  
Who're every night without you...
