

Our Love

Editors

All eyes on you now
The cigarette burning, the taste of ash in your mouth
I understand, I understand
This ain't a dream, it's your world caving in (I always knew)
Your world caving in (I always knew)

Strange clouds I'm under
Waiting from nothing, now you've got no place to hide
Our love is a moment in time
I always knew you'd get the feeling that's right

Get a feeling that's right
Oh, get a feeling that's right
Jump in the city
To get a feeling that's right (I always knew)
(I always knew)
(I always, I always, I always knew)

Don't start believing
Jump in the city, hide the voices within
Our love is a moment in time
I always knew we'd get the feeling that's right

Get a feeling that's right
Oh, get a feeling that's right
Jump in the city
To get a feeling that's right

Ooh, streetlights illuminate feeling
Ooh, red sky, just don't stop believing
Ooh, streetlights illuminate feeling
Ooh, red skies, just don't stop believing

(I always knew)
(I always, I always, I always knew)
