Old Shit/New Shit

Everyone loves you Nobody cares An awful collection Of enemies and friends Congratulations to you With sad regrets I'm tired of the old shit Let the new shit begin

The psychic pain Of living in this world Is overwhelming me Again and again A beautiful afternoon Inside you in your bed I'm tired of the old shit Let the new shit begin

Nobody loves you Everyone cares None of them know what's Coming 'round the bend Congratulations to me Many happy returns I'm tired of the old shit Let the new shit begin
