Conflicted
Can you forgive and forget
You can't fix it
When you live in regret
Are you afflicted
Or does it burn inside
Carpe diem

Say what you have to say Before times slips away Make the change

Don't deny it
I know your terrified of yourself
You can't fight it
I know your screaming for help
You chase riots
But your running blind
Carpe diem

Say what you have to say Before times slips away Make the change

Say what you have to say Before times slips away Make the change

Say what you have to say Before time slips away Make the change

Say what you have to say Before times slips away Make the change

Say what you have to say Before times slips away Make the change

Don't deny it
I know your terrified of yourself
You can't fight it
I know your screaming for help
You chase riots
But your running blind
