

# Blow It All Away

Eilen Jewell

Let's just keep driving you and me  
I like your soft voice and your pleasant company  
We can pull each other out of this dusty little town  
Make a new start somewhere maybe settle down

I wanna get me a mean little bike  
Black and chrome or anything you like  
You can teach me how to ride it in style  
Put it on the pike and head south a million miles

I asked the wind as it blew on by  
What we should do and it replied  
Blow it all away  
All these burdens needn't stay

I wanna fix up a row boat for you  
We could row it out at sunset and you know what we could do  
Doesn't it feel like this is how it should be  
These stars, these dreams, and you and me

Sometimes I feel like the world's on my back  
Like there's so much to lose and so much I lack  
But the truth is the world's at my command  
The way you love me it's all in my hands

A breath and a wish, and we're gone
