

Amen

Elán

When now a bodies do agree
It's like a prayer for you and me
When times of sorrow come and stay
Loving will shield us grand as a grace

The only future, the only past
It seems our hearts will always last
What love has spoken down by name
For ever, ever A - men

We want know how it all began
We'll never know, not understand
Against the wind and than braving rain
As lost as forever Amen

And when we need a guiding light
Loving will shield us thru the night
It's never gonna be the same - forever, ever Amen
What love has spoken down by name - forever, ever Amen

The only future, the only past
It seems our hearts with always last
What love has spoken down by name - forever, ever Amen
It's never gonna be the same - forever, ever Amen
What love has spoken down by name - forever, ever Amen
