A Love Like Ours

Getting better, on your feet Take a look, kept in deceit A love like ours will never die

Break my bonds, break my back Not a lot to break apart A love like ours will never die A love like ours will never die

Break my bonds and break my back Not a lot to apart A love like ours will never die A love like ours will never die

Getting better, on your knees Three times blind, could not please A love like ours will never die A love like ours will never die A love like ours will never die Elastica
