

Julie Don't Live Here

Electric Light Orchestra

I wander through the town
A town I knew so well but it seems so strange
The wind blows cold
I remember when I thought your street was paved with gold
I walked along the street
A street I walked along many times before
The things have changed
Everything I ever knew was gone or rearranged

R: Julie don't live here anymore
She moved away many years before
How can it be, this I can't believe
Julie don't live here anymore

I walked up to your door
Last night I saw your face in the window
But it was different now
The lonely light where we used to be quite gone

I thought about your smile
Your laughing eyes and the things you said to me
I felt so sorry for you
For all the nights we spent hanging around with nothing else to
do

R: Julie don't live... (2x)

Julie don't live here anymore
Julie don't live here anymore
Julie don't live here anymore
