Julie Don't Live Here

Electric Light Orchestra

I wander through the town A town I knew so well but it seems so strange The wind blows cold I remember when I thought your street was paved with gold I walked along the street A street I walked along many times before The things have changed Everything I ever knew was gone or rearranged

R: Julie don't live here anymore She moved away many years before How can it be, this I can't believe Julie don't live here anymore

I walked up to your door Last night I saw your face in the window But it was different now The lonely light where we used to be quite gone

I thought about your smile Your laughing eyes and the things you said to me I felt so sorry for you For all the nights we spent hanging around with nothing else to do

R: Julie don't live... (2x)

Julie don't live here anymore Julie don't live here anymore Julie don't live here anymore
