

# Love Changes All

Electric Light Orchestra

Love changes all  
Love changes all  
I never knew it was on my mind

But love changes all (love changes all)  
Love changes all (love changes all)

You came along  
You sang my song  
I never knew if you would ever call

But love changes all (love changes all)  
Love changes all (love changes all)

Go on, Don't let it get away  
Save it another day  
In your life  
Don't let it slip away in the night

Love changes all (love changes all)  
Love changes all (love changes all)

Go on, Don't let it get away  
Save it another day  
In your life  
Don't let it slip away in the night

What could I do?  
There was me and there were you  
I didn't know what I'd got on my mind

But love changes all (love changes all)  
Love changes all (love changes all)

Love changes all  
Love changes all  
Love changes all, etc.
