Secret Lives

Electric Light Orchestra

I don't know, I don't know what's on your mind I thought everything was fine, But it was my surprise I don't know, I don't know what's going on Something surely must be wrong, You're living secret lives Living secret lives, secret lives And I wonder where she goes to in the night In secret lives Wish I knew, Wish I knew where I fit in Wish that I knew everything About your secret lives If it means, If it means that much to you I don't want to stop the things you do I don't need alibis Living secret lives, secret lives And I wonder where she goes to in the night In secret lives I don't care, I don't care what goes on there As long as one day I can share, Share your secret lives Living secret lives, secret lives And I wonder where she goes to in the night In secret lives Secret lives, living secret lives And I wonder where she goes to in the night In secret lives Secret lives, secret lives And I wonder where she goes In secret lives Secret lives, secret lives Secret lives, secret lives Secret lives, secret lives Secret lives, secret lives...
