

Future Is in the Future

Electric Six

If money talks than I'm a mime,
If time is money than I'm out of time
And I was once with a million quid
Have a seat I'll tell ya what I did

Can't sit down because I'm a dancer,
And you know that I'm the answer
Die slow die fast now
Cause its never going to last now

We'll karaoke all night long,
We'll Macarena 'til the break of dawn
We'll drive around until the morning light
All night, all night, all night, all night

Baby, you got to single before you turn,
I think you're heading for the disco burn
Cause the future is in the future,
And the past is a big brick wall,
You know I need to make you understand now,
I'm a man not a disco ball

Can't sit down because I'm a dancer,
And you know that I'm the answer
Die slow die fast now
Cause its never going to last now

We'll karaoke all night long,
We'll Macarena 'til the break of dawn
We'll drive around until the morning light
All night all night all night all night

We'll karaoke all night long,
We'll Macarena 'til the break of dawn
We'll drive around until the morning light
All night, all night, all night, all night
All night, all night, all night, all night
All night, all night, all night, all night
All night, all night, all night, all night
All night, all night, all night, all night
