

Gay Bar Part Two

Electric Six

I used to dress in black every night
I used to dress in black every night
But something happened to me
Something happened to me
And now, I dress in white

You used to get it wrong every night
You used to get it wrong every night
And there was nothing left to do
But pump high voltage into you
And now, you mostly get it right

And you were blinded for the moment
By my country and western star ship last night
You were tumbling and bumbling
Like a bird that's just had it's wings clipped...in flight

And the congregation of the prayers begins to sing
They were such delinquents joining the kill
Of the soft steaming shits demanding...
Gay bar part 2

I used to dress in black every night
Now I dress primarily in white
And I was under duress
removed my pants and my vest
...and now I'm undressed tonight

And you were silenced for the moment
By my peter paul and mary box set ...last night
You were tumbling and bumbling like a pugilist being pummeled .
..in flight

And the leagues of evil temper began to sing
And the menacing ending caused you such fright
There's something very wrong with you

So let's stay in tonight
She was my dark angel every night
She was my dark angel every night

Something happened to her
Something happened to her
And now... she's white
