

# I Invented the Night

Electric Six

Hey little kitty with your tail dragging on the floor  
You could have a following in every town that you go  
But you remember what you said to me  
That you are nothing without me

Cuz I invented the night  
Yeah I invented the night  
In my laboratory using lust and lies

Hey little birdie fly until your wings desert you  
And when you come down, come down on me cuz you know I will never hurt you  
But maybe once or twice I'll ruffle your feathers  
Cuz you said we should always be together

Cuz I invented the night  
Yeah I invented the night  
Mixing elements of the strangest kind

And should your invention be destroyed in a fire  
John, it's only Monday  
I gave you Tuesday night and Wednesday night and Friday night  
The weekend is a sea of electric light  
Turn it on

Hey little doggy always looking for a bigger bone  
Try to see how many times that you can run away from home  
But in the end you always come back to me  
Cuz you are nothing without me

Cuz I invented the night  
Yeah I invented the night  
Mixing elements of the strangest kind
