

# Night Vision

Electric Six

You can come and see me  
But I don't glow in the dark  
So you'll have to learn to use a little night vision

Then you must decide  
Who resides in your heart  
And baby I know it's not an easy decision

Oh  
I-I went bananas, when I spoke with you on the telephone  
I feel you lie telling me you're all alone

'Cos there's demons in you  
And there's demons in me  
Is it too dark for you to see?

Now you don't want to hear it  
But it's time that you realise  
That your eyes aren't being properly utilised  
You can turn off the television  
You can turn off the lights  
But you can't hide from the darkness of your lies  
Woah!

There is a lunatic who lives in the centre of your mind  
He's eating you and leaving this insanity behind

And he's taking over you  
And he's taking over me  
Is it too dark for you to see?

You can come and see me in the dark  
(If you use night vision)  
Don't need no fire and no spark  
(If you use night vision)  
Give this love a kick start  
If you use night vision

Night vision!

Night vision!

Night vision!

Night vision!

In the land of the blind  
The night vision users are laughing at the king  
But you'd be surprised what you can see  
When you shine your evil light on me

There we were  
Just the two of us  
Watching night fade into darkness  
I was dying  
Then you saved me  
Brought me back

Just to say to me

Woah!

There are asteroids in the sky brighter than you ever will

There are humanoids that love money so much that they would kill

And it's taking over you

And it's taking over me

Is it too dark for you to see?

You can come and see me in the dark

(If you use night vision)

Don't need no fire and no spark

(If you use night vision)

Give this love a kick start

If you use night vision

Night vision!

Come and see me in the dark!

Night vision!

Come and see me in the dark!

Night vision!

Come and see me in the dark!

Night Vision!
