You can shake it all around You can go up and down You can lose what you found But you can't ignore my techno

You can go west or east Confess your sins to a priest You can slay the wicked beast But you can't ignore my techno

You can go to the doctor
And you can cough in his face
Infect the whole human race
But you can't ignore my techno

You can laugh you can cry You can live you can die Spend your days asking why But you can't ignore my techno

You can trip on my synthesizer Electronic world for every boy every girl You can trip on my synthesizer In the end technology unto the world will set us free

Be all that you can be Just as long as you are free You were blind and now you see That knowledge is my techno

You can trip on my synthesizer Electronic world for every boy every girl You can trip on my synthesizer In the end technology unto the world will set us free

You can trip on my
You can trip on my
You can trip on my
You can trip, You can trip
You can trip on my synthesizer
You can trip on my synthesizer
Let's go
