

Static On Channel 4

Elefant

Moon and stars above us shine
Everybody knows you're mine
Static on the channel 4
Television radio, hold me close when you are cold
Now I've got to get us home, everybody knows you're stoned

And when you hear me calling
You will turn away and see me standing there
Waving my old colors, lifting up my arms
And you will understand

Kiss me on the lips again
Millions are just tuning in
Sattelites begin to spin
Listen close and let me in

And when you hear me calling
You will turn around and see me standing there
Waving my old colors, lifting up my arms
And you will understand

You will understand
