Static On Channel 4

Moon and stars above us shine Everybody knows you're mine Static on the channel 4 Television radio, hold me close when you are cold Now I've got to get us home, everybody knows you're stoned

And when you hear me calling You will turn away and see me standing there Waving my old colors, lifting up my arms And you will understand

Kiss me on the lips again Millions are just tuning in Sattelites begin to spin Listen close and let me in

And when you hear me calling You will turn around and see me standing there Waving my old colors, lifting up my arms And you will understand

You will understand

Elefant
