

Echo Song

Element Eighty

You said that we would always be friends
You said our love would never end
All you gave to me were scars in my heart
All you did to me was tear my world apart
And left these scars in my heart

You took my love and made it bend
You knew my money was for you to spend
You stabbed my heart with the sharpest dart
And all you left me with were scars in my heart

Scars in my heart (4x)

You took my love way past the line
You took this broken heart and you made it mine
I don't need your sympathy
I don't need one damn thing

Now I'm scarred (3x)
Forever

You said that we would always be friends
You said our love would never end
All you gave to me were scars in my heart
All you did to me was tear my world apart

Now I'm scarred (3x)
Forever
