

# Let's Drive Away

Eleni Mandell

Let's drive away  
Let's hit the road  
We'll leave the spotlight to the pretty boys and girls  
See the fireworks  
Glitter through the smoke  
Let's drive away  
Say here we go  
We'll send a postcard from the desert  
Before we lose our way  
With only one canteen of water

Constellations fill our eyes before we drown  
Walking back, I know to make it back to town  
And we make it back to town  
Just in time to say our byes

Let's drive away  
It's true, you know  
I always wanted you to drag me from this paradise  
So we could freeze together in the snow

Constellations fill our eyes before we drown  
Walking on, I know to make it back to town  
And we make it back to town  
Just in time to save our lives  
Save our lives

Let's drive away  
Let's leave tomorrow  
We'll phone to say it's lovely here beside the ocean  
Just before we put up windows for the storm

Constellations fill our eyes before we drown  
Walking on, I know to make it back to town  
And we make it back to town  
Just in time to save our lives  
Save our lives (3x)
