

What Is Time

Elephant Revival

Oh there is a clock on a coffee machine
Telling you what time it is relative to where you've got to be.
There is a clock on the console of your car
Telling you what time it is relative to how far you've got to go
Before you're there at your destination.
Could be a place of work, a place to rest, or the watering hole
.
But the question remains,
Well what is time?
It's when the sun comes up,
The sun goes down,
The moon comes out,
The people dance all around.

Even Einstein said time is not a condition in which we live.
S'a condition in which we think and we can change the ways we think.
So the question remains,
Well what is time?
It's when the sun comes up,
The sun goes down,
The moon comes out,
The people dance all around.
