

Ghost

Eli Lieb

Every day every moment I'm a ghost
Every day every moment I'm a ghost

The world is on fire up in flames
And buildings are burning where children play
Don't ask me a question I won't tell you all my lies
You want me to fool you while you look me in the eyes

Every day I'm fading more into a ghost
Barricades are closing off where I can go
Closing in and pushing me far away
Every day and every moment I'm a ghost

Praying to alters praying for faith
A man with a gun has lost his way
There's ash in the air and it's cold outside
And I've lost all my places to hide

Every day I'm fading more into a ghost
Barricades are closing off where I can go
Closing in and pushing me far away
Every day and every moment I'm a ghost

Every day I'm fading more into a ghost
Barricades are closing off where I can go
Closing in and pushing me far away
Every day and every moment I'm a ghost
