

Tidal Waves

Eli Lieb

Would you take my hand tonight I need a place to hide
if I crept inside your room would you say
that it's you that I want that I'd die for
that it's you that I need that I'll wait for
Hoping a tidal wave will come and sweep us all away
and strand me
Nothing about this place would keep us down
and tidal waves will surround you
and tidal waves will surround you
If I begged you one last time would you cover me
and if I told you all my lies would you say
that it's you that I want that I'd die for
that it's you that I need that I'll wait for
Hoping a tidal wave will come and sweep us all away
and strand me
Nothing about this place would keep us down
and tidal waves will surround you
and tidal waves will surround you
Are you waiting for the sight of smoke the sight of fire
are you waiting for me
Hoping a tidal wave will come and sweep us all away
and strand me
Nothing about this place would keep us down
and tidal waves will surround you
and tidal waves will surround you
