

# Always The Love Songs

Eli Young Band

We used to pull off Highway 249  
Had a cool little place where we'd go and hide on Friday night  
And get away from the city lights  
We'd find a little wood and build a fire  
Somebody'd always bring a couple guitars  
And we'd take turns singin' songs and watching it burn  
We'd do "Ramblin' Man", "Proud Mary", and "American Band"  
We'd be singin' at the top of our lungs

It was always the love songs every time  
Made everybody feel something inside  
With the fire down low held your girl real close  
Made you wanna love the one you were with  
Gave you the courage for that first kiss  
It was the love songs always the love songs

There was always a line that stuck in your head  
That was said in a way you wished you could've said  
But you both knew they were singin' it right to you  
It felt so good those times you had  
That feelin' of wanting somebody so bad  
Made you weak in the heart you couldn't take being apart  
Honky Tonk drinkin' songs we could do 'em all night long  
But the ones we remember most

It was always the love songs every time  
Made everybody feel something inside  
With the fire down low held your girl real close  
Made you wanna love the one you were with  
Gave you the courage for that first kiss  
It was the love songs always the love songs

We'd be singin' at the top of our lungs

It was always the love songs every time  
Made everybody feel something inside  
With the fire down low held your girl real close  
Made you wanna love the one you were with  
Gave you the courage for that first kiss  
It was the love songs always the love songs

Always the love songs  
Always the love songs
