Brothers

In a night so long ago We made this eternal vow We are brothers Raised by our mother's loving hand We are brothers Forever together we will stand Since the day that you were born I felt your special energy In your body painfully torn They are too blind they cannot see We are brothers Raised by our mother's loving hand We are brothers Forever together we will stand Wherever you go, they listen to you A perfect body hides a perfect soul One day to come they'll follow Eternal truth will be our highest goal Be aware of your fate Your future looks black Fire in the air Burn! We make this eternal vow Through us your love will grow Oh mother you will see Your knowledge sets us free We are brothers Raised by our mother's loving hand We are brothers Forever together we will stand
