

Catch the Light

Elisa

Try and catch the light
Try and catch the sun
You'll find it all
Look at the world
Try and let it out
Try and breath it in
They feed the greed, no
They're not in need

Children, get lost in the music
Stomp the feet and do it
As they catch the light in the palm of their hand
They're flying
Looks as if they're flying
Dancing without moving
Halfway through the air as our eyes look up at this magic

Try and catch the light
Try and catch the sound
You'll find it all
Look at the world
Try and let it out
Try and breath it in
They feed the greed
They're not in need

Children, get lost in the music
Stomp the feet and do it
As they catch the light in the palm of their hand
They're flying
Looks as if they're flying
Dancing without moving
Halfway through the air as our eyes look up at the ceiling
Get lost in the music
Stump the feet and do it
As they catch the light in the palm of their hand
It's magic

What you found is dragging you around
You don't talk, you don't shout, no
Now, you know well what's the meaning
